Subject: Microsoft MUST be brought down a significant notch!

I find it HARD to believe that intelligent people do not see the follie in this dragged-out case. THE US has already decided MS is a monopoly and now you want to congratulated them as a punishment while the rest of the world looses innovation left and right.

Innovation in the computer world is AN ENGANGERED LIFEFORM!!!! How can any small entity compete with this control-freak of a company? All they can do is be absorbed and innovated technology gets shelved.

YOU (THE US GOVT.) need to do something for the people for a change. You continue to perpetuate the reality that companies are more important than individuals...no matter what you belief system is...God or Evolution didn't create organization...individual were created first.

I resent with such ferocity the crap that gets stuffed down my throat by Microsoft. PLEASE do something for the people for a change...give us an environment rich in innovation not a desert.
